

Physical consistency before radiomic extraction

1 Declare

Retain the source

Specify grid and sampling

Crop · pad · orient · resample

2 Check

Compare independently

Position · intensity · region

Sampling and coverage

3 Decide

Report the next step

Preserved input: apply profile

New sampling: extract again

Ambiguous boundary: review

301

public MRI/CT volumes

260 MRI · 41 CT

1605 / 1605

active test faults detected

Paired checks: 0; geometry: 401

11

CT resamplings indeterminate

2096 / 2107 controls satisfied

Own-wrapper perturbations. Indeterminate cases are not approvals. Research preprocessing only.
